

Office Memorandum • UNITED STATES GOVERNMENT

TO : Assistant for Operations, OSI
ATT : [REDACTED] 25X1A
FROM : Chief, Contact Division, OO

DATE: 9 February 1953

SUBJECT: California Committee for Saucer Investigation

25X1A

25X1A

1. Recently, [REDACTED] had occasion to hear Dr. [REDACTED] tell something of the activities of the California Committee for Saucer Investigation (CSI). His comments, as follows, may be of interest:

25X1A

25X1A

2. [REDACTED]

He gave every impression of being a competent scientist, especially knowledgeable on rocket matters. He seemed a balanced person, not given to fixations.

25X1A

3. CSI has been in operation some years, composed of private individuals intrigued and scientifically interested in finding an explanation for "saucer" phenomena. To date, they have received some 1570 letters relating to reported sightings. Of this number, they have been able to immediately or quickly eliminate 75% as not worth follow-up. The great proportion of this 25% have been discarded upon further investigation. What was somewhat surprising to the writer was the exhaustiveness with which these investigations are being made. Not only are very careful calculations made, if the data exists, to check the possibility of the report being physically possible (e.g., in terms of lines of sight), but the individual reporting the sighting is investigated privately at his place of residence to establish a general background of reliability and credibility. Of the 25% investigated, perhaps 25 or so sightings have been established as "reliable" in the sense that no known existing explanation exists for them. Apparently, most of these have been forwarded to Wright Field, Dayton, Ohio, although there appears to be a time lag of some duration while CSI is making its own check and calculations. [REDACTED] description of one reported sighting by a TWA pilot and crew, and the follow-up with respect to it, was impressive to the writer in the thought applied, the pains taken, and the very careful application of scientific method.

25X1A

25X1A

4. So serious is CSI with respect to its investigation that [REDACTED] indicated that they are going to execute a planned "hoax" over the Los Angeles area, in order to test the reaction and reliability of the public in general to unusual aerial phenomena. (The sightings reported over Malibu in the Los Angeles papers on Jan 53 could possibly be this hoax.) From this experiment, they hope to ascertain how many people report an aerial visual phenomenon which has been conducted so as to be clearly visible to a large number of people in the area. They will also, of course, be able to test the variation of report details, etc. This experiment is designed to give a better background against which future sightings can be evaluated.

5. Apparently, an eye and interest are also directed toward the USSR, for reactions to sightings as reported in the PRAVDA are observed. This interest is also evident in the paper entitled "Rockets Behind the Iron Curtain", presented before the annual convention of the American Rocket Society in New York City on 4 December 1952, by George P. Sutton, also of Aerophysics Department (North American Aviation, Inc.) and associated with CSI.

✓ 6. Of incidental interest may be the fact that NAA (National Aeronautical Association) suggested politely and perhaps indirectly to [REDACTED] that he disassociate himself from official membership on CSI.

ROUTING AND RECORD SHEET

INSTRUCTIONS: Officer designations should be used in the "TO" column. Under each comment a line should be drawn across sheet and each comment numbered to correspond with the number in the "TO" column. Each officer should initial (check mark insufficient) before further routing. This Routing and Record Sheet should be returned to Registry.
